This policy pertains to the towing of the Corporation's water rescue equipment by a private vehicle.

The Corporation requires that the owner of a private vehicle that tows the Corporation's water rescue equipment shall have proper insurance. The Corporation will compensate the differential in insurance premium costs to an owner of a private vehicle in order that the owner's private vehicle may tow the water rescue equipment.

The owner of a private vehicle shall provide to the Corporation a copy of the vehicle's insurance prior to towing the water rescue equipment.

The Corporation will compensate the owner of the private vehicle at the kilometric allowance rate as stated in the Corporation's Travel and Meal Allowance Policy, P-2, for towing the water rescue equipment to a required rescue location and return to the Sussex Fire Station.

The Corporation will compensate the owner of a private vehicle for the increase in insurance costs if such vehicle insurance is increased as a result of an accident while towing the Corporation's water rescue equipment.
