POLICY STATEMENT

This Policy recognizes that cigarette, cigar and/or pipe smoking is a major contributing factor in the development of early coronary heart disease, chronic chest disease, carcinoma of the lungs as well as cardiovascular diseases and also recognizes that second-hand smoke is a significant hazard to non-smokers, particularly to individuals with allergies, respiratory, cardiovascular and/or other diseases.

The 8th Hussars Sports Centre's primary function is to provide an avenue for participation in a form of physical activity and that by providing a smoke-free environment; we are enhancing the participant's and spectator's lifestyle.

Provincial Law also dictates that smoking is not permitted in any public building.
