1. The on ice cleaning and flooding program is required to provide a quality and safe ice product for the ice users.

2. At no time is there to be anyone on the ice surface while the Ice Resurfacer and/or its driver are still cleaning and flooding the ice. Failure to abide by this will result in the driver leaving the surface until it is vacated by the skaters. Once the ice is vacated, the driver will re-enter the area and complete his task.

3. As a result of the Ice Resurfacer and driver leaving the ice surface, any ice time lost will not be regained by the organization and they will have to leave the ice at the time previously scheduled for this ice slot and will be billed for the entire time slot.
