2019 ANNUAL WATERMAIN & HYDRANT FLUSHING

To help minimize the inconvenience, again this year the works department will conduct their annual hydrant flushing program in the overnight hours – **BETWEEN APPROXIMATELY 10:30 PM AND 5:00 AM DAILY.**

The purpose of this Flushing Program is to ensure that the water quality is maintained in the distribution system and to ensure that the system's isolation valves and fire hydrants are operating properly.

This may cause the water in your area to be discoloured but only when the work is being carried out in your immediate area. If discolouration continues, please contact the Town Office at 432-4540. **BE ADVISED THAT LAUNDRY SHOULD NOT BE DONE ON THE DATE ON WHICH YOUR WATER MAY BE AFFECTED.**
